CYBURITY

ABOUT CYBURITY

Cyburity is a technology company that prides itself on excelling at **“All things cyber”**

We manage the Cyber Security & IT needs for numerous companies and have specialized helping our customers achieve a secure infrastructure that also meets the compliance needs of our customers. We have experience in implementing ISO, HIPAA, NIST 800-53, NIST 800-171 & CMMC compliance. We have handled the periodic audits of classified computers for some of our customers and Cyburity has multiple employees holding security clearances, including some with Top Secret. Our team excels at conducting penetration testing and vulnerability assessments. We have both red-teams and blue-teams, with skill on both offensive and defensive cybersecurity. Additionally, we have an extremely skilled software engineering division that is utilized on several successful software development projects for both our customers and for our own in-house projects. Cyburity is a member of the FBI NDCA team. Additionally, our team members hold a variety of certifications in cybersecurity, digital forensics, and software development. Our team is involved with teaching cybersecurity, including teaching courses at UAH.
