# CYBURITY

## DIGITAL FORENSICS AND INCIDENT RESPONSE

---

Cyburity's digital forensic analysts are experienced in preserving, collecting, analyzing, and presenting evidence located on computers and other digital devices. This process requires a unique set of skills and specialized tools, which most organizations do not have in-house. From the initial acquisition of digital information to the final conclusions presented in an expert witness report, all evidence must be handled in an admissible and defensible way. This is exactly what you will receive when you retain Cyburity. Our team of skilled and certified forensic experts adheres to these standards and will ensure that any investigations are of the highest quality.

### We can assist with:

- Accounting Abuse
- Corporate Espionage
- Counterintelligence
- Data Breaches
- Discrimination Claims
- Embezzlement
- Intellectual Property Theft
- Non-disclosure Agreement
- Expert Witness Services
- Internal Investigations
- Ransomware & Malware
- Workers Compensation Claims
- Non-compete Violations
- Billing Fraud

## Corporations

- The information collected from a digital forensics investigation is unbiased, allowing you to base your decisions on a more solid framework than statements collected from employees and other 3<sup>rd</sup> parties.
- Examples of corporate forensic investigations can include investigations into sexual harassment, departing employees, theft and fraud, workplace threats and employee allegations.

## Law Firms

Every attorney knows that in litigation, identifying and locating critical evidence and testimony can make the difference between winning and losing a case.

Digital information has become a key factor that cannot be neglected.

Cyburity possesses the understanding of techniques, tools & technologies used in digital forensics as well as how these should be applied both ethically and legally

## WHY CYBURITY

The Cyburity digital forensics team has experts who are at the leading edge of the field. Some of our computer forensics research has been published in IEEE conferences and papers. We have completed numerous forensics training programs, including International Society of Forensic Computer Examiners (ISCFE). We are also equipped to handle mobile forensics and have completed both the intermediate and advanced XRY mobile forensics certifications.

Cyburity also has the necessary specialized equipment to properly perform digital forensics, including hardware write-blockers for all varieties of hard drives and USB media, as well as physical disk cloners, converters, adapters, and other needed tools.
